

BEACH KING®

THE NEXT GENERATION: BIGGER. FASTER. BETTER.

PICK UP BOTTLE CAPS, SEAWEED, AND CIGARETTE BUTTS IN A SINGLE PASS

The Rockland Beach King® established Rockland as the world leader in beach cleaning technology. For over 40 years, the world has used Beach Kings from Florida to California and Canada to New Zealand.

The Beach King® is the next generation. A combination of 40 years of experience and valuable user input, the Beach King® is the undisputed king of beach cleaning machines.

HAIL TO THE KING!

TEN REASONS THE BEACH KING® RULES

HYDRAULIC DRIVE SYSTEM

A PTO mounted pump makes it easy to attach the Beach King® to any tractor. A Variable Speed Control Valve allows the operator to control the Feed Reel & Belt speed as sand conditions dictate. A Selector Valve allows the operator to have forward & reverse control of the Belt for easy cleaning or maintenance.

POWER FEED REEL

The adjustable power Feed Reel delivers a smooth continuous flow of sand and trash to the conveyor belt for maximum productivity and total cleaning. Feed reel operating height has floating action to suit different applications, such as picking up seaweed, storm cleanup, or deep cleaning.

CONVEYOR BELT

A tough mesh steel belt separates sand from debris, keeping the sand on your beach. The belt is supported by heavy-duty steel rollers that turn on triple sealed bearings. An optional stainless steel belt is available as well as a fine mesh option for smaller debris.

BELT BRUSHES

Three rugged poly brushes swing into position to help clean damp sand. They easily swing out of the way for collecting seaweed.

RUGGED FRAME

The Beach King® is built to construction machinery standards for years of dependable, trouble free service. Built from high strength, heat-treated alloy steel. It is not some bolted together mechanical nightmare that sponsors corrosion.

BUCKET

The Beach King® has a reinforced bucket that holds 1.8 cubic yards of debris. More time is spent cleaning the beach and less traveling to a trash container or truck. The bucket can dump material at any height up to a maximum of 9 feet.

SIFTING ACTION

The Beach King® sifts sand faster than ever because of improved belt action. This translates to less sand in the bucket and a beach that is cleaner.

GROOMER

The integrated hydraulic groomer is engaged through the tractor's hydraulic controls and automatically lifts from the sand when the pressure is released. The groomer leaves your beach the way it should be - safe, smooth, and clean.

SAFETY & LIGHTING

The Beach King® comes standard with safety in mind. A light package for directional, stop, & floodlights are included along with electrical plug to mate to the tractor outlet. A slow moving sign along with reflectors help keep the operator safe & seen.

TOW TRACTOR INFORMATION

The minimum requirements are a 70 HP agricultural tractor with a 540 RPM PTO, 3-point hitch, flotation tires, & (2) rear selective control valves (SCVs) to operate the lift and dump cylinders of the bucket. (1) Additional rear selective control valve is recommended to operate the groomer function of the Beach King®.

WARRANTY

Rockland Beach King® is guaranteed against failure due to defective design, workmanship, or materials for a period of one year or 2000 hours.

Beach King® Specifications

Height	8' 8"
Width	98"
Cleaning Width	72"
Length Overall	23' 9"
Bucket Capacity (Yd ³)	1.8
Bucket Dump Height (maximum)	9'
Tires	38x20.00-16.1 8 PLY High-Flotation
Conveyor Belt-Standard	Alloy Wire Mesh Coarse Mesh (10 space/ft)
Conveyor Belt-Optional	Fine Mesh (12 space/ft)

Specifications subject to change without notice.
