## ExCAVATOR CRAPPLEE

 INCREASE EXCAVATOR PRODUCTIVITY

## TWO MODELS FOR ALL APPLICATIONS

Rockland Excavator Grapples really get the job done! Whether it be demolition work, loading rock, clearing land, or handling trash, there is a Rockland Excavator Grapple for your application.

Rockland Excavator Grapples are designed to produce and built to last. They are built entirely out of high strength, alloy steel plate, and use the same Rockland reinforced box-frame design. Both models are equipped with replaceable wear plates at the front and rear of each tine. They both pivot on heattreated, hardened pins and bushings.

H23 Severe Service - The H23 was designed specifically for rough applications. Its narrow, twotine clamp and three-tine frame maximize both clamping and digging forces. It is recommended for heavy-duty demolition work, rock handling, severe land clearing jobs, and other applications that require maximum clamping, prying, and breakout forces.

L45 Light Material - The L45 is designed for handling trash, light scrap, or other light, bulky material. Its wide four-tine clamp and five-tine frame efficiently handle large loads of lighter materials for maximum loading efficiency.

All Rockland Excavator Grapples are built with the same dedication to quality that made our other products famous. We build great grapples and we back up that claim with a no nonsense, 2 year/4000 hour warranty. Increase your excavator's productivity- specify a Rockland Excavator Grapple.

## MOUNTING INFORMATION

Rockland Excavator Grapples mount on the stick in place of the standard bucket using standard factory pins. An optional Rockland pin and bushing kit is available that allows the grapple to be installed on more than one machine in the same weight class. The grapple is supplied with a support strut and a strut mounting bracket that must be welded to the bottom of the excavator stick.

## WARRANTY

Rockland Excavator Grapples are guaranteed against failure due to defective design, materials, or workmanship for a period of two years or 4,000 hours.
